JUNIOR GAME DEVELOPER

WORK AT FL-SIMULATORS

We are looking for passionate, creative people who want to solve problems big and small and have a big heart for games and emerging technology.

Join our team in Belgium and help develop challenging and engaging content for our VR simulators. Work in an international team in Ghent or Antwerp.

Please send all your applications to info@forklift-simulator.com. Be sure to include résumé, portfolio, examples, 3D renders, tech demo's, code samples, work experience...

DESCRIPTION

As a junior game developer you will perform game and tools development tasks on our VR simulator content in Unity, as well as other custom enterprise projects utilizing game dev technology. You are expected to work on the design, prototyping, development and testing of production code as well as tools and scripts. This will mostly entail development in C#, with additional work in C++, Objective-C, PHP, Javascript and/or Python.

REQUIREMENTS

· Bachelor or master's degree in game development, computer sciences or similar.
· Experience with VR development.
· Experience with Unity.
· Strong programming knowledge, including C# and/or C++.
· Solid understanding of algorithms, physics and math.
· Good understanding of OO programming, UML, Software Design and patterns.
· Proficient in English.

QUALIFICATIONS

· Positive attitude and desire to succeed and grow.
· Understand the time, care, and iteration required to create finely crafted games.
· Ability to receive feedback and critique.
· Ability to write comprehensible code and follow coding standards.
· Attention to detail.

BONUS

· +1 year of industry experience.
· Experience with multiplayer and networking code.
· Experience with back-end development (mySQL, PHP and/or Facebook API).
· Experience with Unreal.
· Experience with mobile development (iOS and Android).
· Experience using SCRUM and Agile development methods and tools.
